C. Project Description

1. a. Project Location (use maps and plans to identify the location of the area subject to this request):

Lincoln Street	Seekonk
Street Address	City/Town
16	134
Assessors Map/Plat Number	Parcel/Lot Number

- b. Area Description (use additional paper, if necessary):

A Request for Determination of Applicability filed in 2001 for work on Lot 135 confirmed that a small wetland area located downgradient and west of Lot 134 did not meet the definition of a resource area under 310 CMR 10.00 but rather met the definition of Isolated Vegetated Wetland (314 CMR 9.02). Topographic survey confirmed that the wetland is sloped, such that criteria of Isolated Land Subject to Flooding (310 CMR 10.57) was not met. The entire wetland perimeter was studied and was encompassed by soil sampling to confirm that no wetland connection exists.

- c. Plan and/or Map Reference(s):

Site Development & Sewage Disposal System Plan, Lot 134, Area 36,938 sf, Map 16, Prepared for Robert Drohan, 63 Drohan Court, Seekonk, MA	11/14/02

2. a. Work Description (use additional paper and/or provide plan(s) of work, if necessary):

Proposed construction of a single-family dwelling and associated sanitary sewage disposal system. Included as part of the project will be the extension of an existing drainage outfall from Lincoln Street. Coordination with the Town of Seekonk Public Works Department has been maintained. No wetland resource-area impacts are proposed.

C. Project Description (cont.)

b. Identify provisions of the Wetlands Protection Act or regulations which may exempt the applicant from having to file a Notice of Intent for all or part of the described work (use additional paper, if necessary).

The subject wetland does not fall under jurisdiction of the Wetlands Protection Act. Project limits will be distanced approximately 40 feet from the field delineated wetland edge at its closest point, and perimeter erosion and sedimentation controls will be installed along downgradient project limits. The existing Town drainage pipe will be extended, with no modification of its existing flow. A flared-end pipe section and rip-rap splash pad are proposed to dissipate flow energy and to protect against scouring and consequent erosion.

3. a. If this application is a Request for Determination of Scope of Alternatives for work in the Riverfront Area, indicate the one classification below that best describes the project.

- Single family house on a lot recorded on or before 8/1/96
- Single family house on a lot recorded after 8/1/96
- Expansion of an existing structure on a lot recorded after 8/1/96
- Project, other than a single family house or public project, where the applicant owned the lot before 8/7/96
- New agriculture or aquaculture project
- Public project where funds were appropriated prior to 8/7/96
- Project on a lot shown on an approved, definitive subdivision plan where there is a recorded deed restriction limiting total alteration of the Riverfront Area for the entire subdivision
- Residential subdivision; institutional, industrial, or commercial project
- Municipal project
- District, county, state, or federal government project
- Project required to evaluate off-site alternatives in more than one municipality in an Environmental Impact Report under MEPA or in an alternatives analysis pursuant to an application for a 404 permit from the U.S. Army Corps of Engineers or 401 Water Quality Certification from the Department of Environmental Protection.

b. Provide evidence (e.g., record of date subdivision lot was recorded) supporting the classification above (use additional paper and/or attach appropriate documents, if necessary.)
