

plastic free RESTAURANTS

We **pay schools** to stop using plastic.

If you currently give *any* single-use petroleum-based plastic (cups, utensils, sample cups, containers, trays) to your students, we will buy the stainless steel food ware to replace it. It's that simple.

- We pay the entire cost of stainless steel food ware from a short list of independently lab-tested and approved manufacturers.
- Provided that the need can be demonstrated, there is no cap to the number of items subsidized.
- We even offer "restocking" subsidies on the first anniversary of your initial switch.
- You do not need to go 100% plastic-free. If you want to start with eliminating just your plastic utensils, then that's what we'll help you do.
- **YOUR SCHOOL WILL SAVE MONEY** by switching to resuables, even after accounting for increased labor, equipment, electricity, and water costs. Don't believe us? Contact us and we'll prove it to you.

To apply for your subsidy, please go to
